

# Compostability Meets Extraordinary

At Handgards, we are committed to minimizing our ecological footprint. That's why our disposable gloves are designed with sustainability in mind. We've taken a significant step towards reducing the packaging material and increasing value without compromising quality. Choosing Handgards Planetgards means making an environmentally conscious choice while still fulfilling operational needs.

Handgards PlanetGards Compostable gloves now provide a better value.

Featuring all-new innovative packaging that provides a 150% increase in the volume of gloves in each case, going from 400 to 1,000! Our new packaging design focuses on reducing size for cost-saving shipping practices and convenient storage placement in every corner of your restaurant layout.

They're still the same, durable loose-fitting disposable gloves perfect for easy on/off applications such as sandwich or salad prepping, but these unique gloves are compostable in an industrial composting facility after use!

## New and Improved compact packaging PLUS a 150% increase of gloves in every case!

 New Packaging

# PLANETGARDS® COMPOSTABLE GLOVES

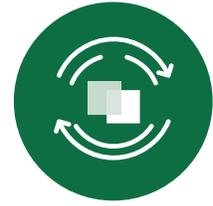

By embracing sustainable practices, operators demonstrate their commitment to environmental stewardship while maintaining high standards of hygiene and safety.

Better value with an improved volume of gloves per case; an increase from 400 to 1,000 gloves in every 4/250 case!

These gloves are designed to break down into organic matter when composted in an industrial composting facility.

Offered in a unique translucent green color and in varying sizes from medium to extra-large.

Reduce landfill waste and methane emissions, aligning the food service industry with sustainable practices.

Promote responsible waste management and contribute to community ecological campaigns.

## FEATURES AND APPLICATIONS

- Lightweight design with better dexterity for easy-on-off use
- Gloves compost to reduce landfill waste
- Durable material with stylish translucent green color
- After use, they can be given a new life as compost
- Available in a new, sleek, space-saving dispenser box
- 150% more product per dispenser means less re-ordering, which means less delivery trucks on the road, and less ocean shipping containers needed.

## APPLICATIONS

- Buffet Serving Lines
- Garnishing
- Food Prep
- Handling Pastries
- Pre-Portioning
- Salad Prep
- Slicing
- Food Processing
- General Purpose
